NEUROSCIENCE AND BIOBEHAVIORAL REVIEWS

VOLUME 5 1981

SUBJECT INDEX

Adjunctive behavior
  polydipsia as alcoholism model, 335
Aggression, 463
  behavioral reactivity
  genetic models
  learning
  spontaneous hypertension
Alcohol
  interaction with stress, 209
Alcoholism
  schedule-induced polydipsia as a model, 335
Alphafetoprotein, 421
  central nervous system
  development
  estradiol receptor
  gonadotropins
  hypothalamo-pituitary-gonadal circuit
  puberty
  sexual differentiation
Amitriptyline
  stress and animal model of depression, 265
Amphetamine
  dopamine, 449
  noradrenergic activity, 449
  norepinephrine, 449
  psychosis, 449
  schizophrenia, model, 449
  serotonin, 449
  stress and animal model of depression, 259
Animal models
  alcoholism, 335
  human depressive disorders, 231, 247, 253, 259, 265, 273
Antipyretics
  body temperature, 1
Aversive shock, 479
  nicotine binding sites
  receptor binding
Aversive stimulation, 343
  self-punitive behavior
  shock escape
Avoidance behavior
  human psychopathology, 355
Behavior analysis, 307
Behavioral pharmacology, 307
Behavioral reactivity, 463
  aggression
  genetic models
  learning
  spontaneous hypertension
Behavioral stress
  cardiovascular regulation, 137
Biofeedback
  clinical applications, 397
  EEG and seizure reduction, 405
  modification of digestive pathology, 401
  recovery of function after brain damage, 371
Blood pressure
  pharmacological studies of behavioral influences, 325
Body temperature, 1
  antipyretics
  cannabinoids
  capsaicin
  cinchona alkaloids
  CNS depressants
  CNS stimulants
  cycloheximide
  dimethyl sulfoxide
  2,4-dinitrophenol
  hormones
  LSD
Brain
  cerebrum, 479
  fourth ventricle, 479
  hippocampus, 473, 479
  hypothalamus, 437, 473
  lateral ventricles, 479
  lateral vestibular nuclei, 479
  pineal gland, 437
  thalamus, 479
Brain calcium, 503
  neuronal calcium kinetics
  radiation, biological effects
  radiation sources
Brain damage
  recovery of function, 371

Cardiovascular function, 325
  behavioral influences
  pharmacological studies
Cardiovascular regulation, 137
  behavioral stress
  neuropharmacology
  neurophysiology
  nicotine binding sites
Central nervous system, 473
  hippocampus
  puberty
  sexual differentiation
Central nervous system, female rat, 421
  alphafetoprotein
  development
  estradiol receptor
  gonadotropins
  hypothalamo-pituitary-gonadal circuit
  stereoisomers
Cerebrum, 479
  nicotine binding sites
  receptor binding
p-Chlorophenylalanine
  experimental phenylketonuria, 177
Cholinergic receptors
  discriminative stimulus, 497
  drug discrimination, 479
  nicotine binding sites, 479
  nicotine sites, 497
CNS depressants
  body temperature, 1
CNS stimulants
  body temperature, 1
Cycloheximide
  body temperature, 1

Depressive disorders
  animal models, 231, 247, 253, 259, 265, 273
Development, 421
  alphafetoprotein
  central nervous system
  estradiol receptor
  gonadotropins
  hypothalamo-pituitary-gonadal circuit
  puberty
  sexual differentiation
Digestive pathology
  gastric biofeedback, 401
Dimethylsulfoxide
  body temperature, 1
2,4-Dinitrophenol
  body temperature, 1
Discriminative stimulus, 497
  cholinergic receptors
  nicotine sites
Dopamine, 449
  amphetamine
  noradrenergic activity
  norepinephrine
  psychosis
  schizophrenia, model
  serotonin
Drinking
  drugs and taste aversion, 279
Drug
  alcohol, 209
  amitriptyline, 265
  amphetamine, 259, 449
  antipyretics, 1
  atropine, 325
  chlordiazepoxide, 279
  chlorpromazine, 279
  cocaine, 449
  2,4-dinitrophenol, 1
  DMSO, 1
  imipramine, 253
  lithium chloride, 279
  LSD, 1
  nicotine, 473, 479, 487, 497
  norepinephrine, 325
  PCPA, 177
  phenobarbital, 279
  phenylalanine, 177
  propranolol, 325
  scopalamine, 265
  Δ^9-THC, 1
  tranylcypromine, 259
Drug discrimination, 479
  cholinergic receptors
  nicotine binding sites
Drug-maintained behavior
  opiate dependence, 315

Electroconvulsive shock therapy
  animal model of depression, 273
Epilepsy
  EEG biofeedback and seizure reduction, 405
Estradiol receptor, 421
  alphafetoprotein
  central nervous system
  development
  gonadotropins
  hypothalamo-pituitary-gonadal circuit
  puberty
  sexual differentiation

Fixed-ratio, 487
  nicotine
  reinforcement
  self-administration
  tolerance
Fourth ventricle, 479
  nicotine binding sites
  prostration
  receptor binding
  rotation
  tonic seizures

Genetic models, 463
  aggression
  behavioral reactivity
  learning
  spontaneous hypertension
Gonadotropins, 421
  alphafetoprotein
  central nervous system
  development
  estradiol receptor
  hypothalamo-pituitary-gonadal circuit
  puberty
  sexual differentiation

Hallucinogens, 197
  indolealkylamines
  mechanisms of action
Heart rate
  pharmacological studies of behavioral influences, 325
Hippocampus
  central nervous system, 473
  nicotine binding sites, 473, 479
  stereoisomers, 473
Hormone, 421
  estradiol
  estrogen
  FSH

gonadotropin-releasing hormone
LHRH
progesterone
prolactin
somatotropin
Hormones
body temperature, 1
Human psychopathology
infrahuman avoidance behavior and two-factor learning theory, 355
Hypertension
cardiovascular regulation, 137
Hypothalamo-pituitary-gonadal circuit
alphafetoprotein, 421
central nervous system, 421, 473
development, 421
estradiol receptor, 421
gonadotropins, 421
mechanism of steroid action, 437
neurotransmitters, 437
nicotine binding sites, 473
noradrenergic transmission, 437
pineal gland, 437
puberty, 421
reproductive physiology, 437
sexual behavior, 437
sexual differentiation, 421
stereoisomers, 473
steroid hormones, 437
steroid-neurotransmitter interaction, 437
steroid receptors, 437
uterus, 437

Indolealkylamines
mechanism of hallucinogenic action, 197

Lateral ventricles, 479
nicotine binding sites
prostration
receptor binding
rotation
tonic seizures
Lateral vestibular nuclei, 479
nicotine binding sites
prostration
receptor binding
rotation
tonic seizures
Learning, 463
aggression
behavioral reactivity
genetic models
spontaneous hypertension
LSD
body temperature, 1

Mechanism of steroid action, 437
hypothalamus
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
uterus
Medical rehabilitation
behavioral methods, 391
Mental retardation
experimental phenylketonuria, 177

Neuronal calcium kinetics, 503
brain calcium
radiation, biological effects
radiation sources
Neuropharmacology
cardiovascular regulation, 137
Neurophysiology
cardiovascular regulation, 137
Neurotransmitters, 437
hypothalamus
mechanism of steroid action
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
uterus
Nicotine, 487
fixed-ratio
reinforcement
self-administration
tolerance
Nicotine binding sites
aversive shock, 479
central nervous system, 473
cerebrum, 479
cholinergic receptors, 479, 497
drug discrimination, 479, 497
fourth ventricles, 479
hippocampus, 473, 479
hypothalamus, 473
lateral ventricles, 479
lateral vestibular nuclei, 479
prostration, 479
receptor binding, 479
rotation, 479
stereoisomers, 473
thalamus, 479
tonic seizures, 479
Noradrenergic activity, 449
amphetamine
dopamine
norepinephrine
psychosis
schizophrenia, model
serotonin
Noradrenergic transmission, 437
hypothalamus
mechanism of steroid action
neurotransmitters
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid neurotransmitter interaction
steroid receptors
uterus
Norepinephrine, 449
amphetamine
dopamine
noradrenergic activity
psychosis
schizophrenia, model
serotonin

Open field activity
amphetamine and stress, 259
imipramine and stress, 253
stress and animal model of depression, 247, 253, 259, 265, 273
tranylcypromine and stress, 259
Operant conditioning
medical rehabilitation, 391

Opiate dependence, 315
behavioral analysis
drug-maintained behavior

Pain, 385
behavioral modification
pain measurement
pain perception
pain report
pain response
pain stimulus
Phenylalanine
experimental phenylketonuria, 177
Phenylketonuria
experimental production, 177
Pineal gland, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
reproductive physiology
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
uterus
Prostration, 479
nicotine binding sites
receptor binding
Psychosis, 449
amphetamine
dopamine
noradrenergic activity
norepinephrine
schizophrenia, model
serotonin
Puberty, 421
alphafetoprotein
central nervous system
development
estradiol receptor
gonadotropins
hypothalamo-pituitary-gonadal circuit
sexual differentiation

Radiation, biological effects, 503
brain calcium
neuronal calcium kinetics
radiation sources
Radiation sources, 503
brain calcium
neuronal calcium kinetics
radiation, biological effects
Receptor binding, 479
aversive shock
cerebrum
fourth ventricles
hippocampus
lateral ventricles
lateral vestibular nuclei
prostration
rotation
thalamus
tonic seizures
Reinforcement, 487
fixed-ratio
nicotine
self-administration
tolerance
Reproductive physiology, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
uterus
Rotation, 479
nicotine binding sites
receptor binding

Schizophrenia, model, 449
amphetamine
dopamine
noradrenergic activity
norepinephrine
psychosis
serotonin
Scopolamine
stress and animal model of depression, 265
Self-administration, 487
fixed-ratio
nicotine
reinforcement
tolerance
Self-punitive behavior, 343
aversive stimulation
shock escape
Serotonin, 449
amphetamine
dopamine
noradrenergic activity
norepinephrine
psychosis
schizophrenia, model
Sex differences, 421
alphafetoprotein
central nervous system
development
estradiol receptor
gonadotropins
hypothalamo-pituitary-gonadal circuit
puberty
Sexual behavior, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
uterus
Spontaneous hypertension, 463
aggression
behavioral reactivity
genetic models
learning
Stereoisomers, 473
central nervous system
hippocampus
hypothalamus
nicotine
nicotine binding sites
Steroid hormones, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid-neurotransmitter interaction
steroid receptors
uterus

Steroid-neurotransmitter interaction, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid receptors
uterus
Steroid receptors, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
uterus
Stress
animal model of depression, 247
interaction with alcohol, 209
open field activity, 247

Taste aversion, 279
barbiturates
chlordiazepoxide
chlorpromazine
lithium chloride
phenobarbital
x-radiation
Thalamus, 479
nicotine binding sites
receptor binding
Δ^9-THC
body temperature, 1
Tolerance, 487
fixed-ratio
nicotine
reinforcement
self-administration
Tonic seizures, 479
nicotine binding sites
receptor binding
Tranylcypromine
stress and animal model of depression
Two-factor learning theory, 355
human psychopathology
infrahuman avoidance behavior

Uterus, 437
hypothalamus
mechanism of steroid action
neurotransmitters
noradrenergic transmission
pineal gland
reproductive physiology
sexual behavior
steroid hormones
steroid-neurotransmitter interaction
steroid receptors
